

## Department of Energy

Washington, DC 20585

November 18, 2015

MEMORANDUM FOR JEFFREY D. FEIT

OFFICE OF QUALITY ASSURANCE  
OFFICE OF NUCLEAR SAFETY

FROM:

BILL R. McARTHUR, PhD, CIH  
DIRECTOR  
OFFICE OF WORKER SAFETY AND HEALTH POLICY  
OFFICE OF HEALTH AND SAFETY

SUBJECT:

Cancellation of Department of Energy Handbook 1141-2008,  
*Radiological Assessor Training*

The Office of Worker Safety and Health Policy (AU-11) is proposing to cancel and archive Department of Energy (DOE) Handbook 1141-2008, *Radiological Assessor Training* (DOE-HDBK-1141-2008), and submits this proposal for review and comment in accordance with Technical Standards Program (TSP) procedures.

AU-11 staff conducted a survey of DOE field and contractor training personnel and learned that sites that conduct radiological assessor training as described in DOE Standard 1098-2008, *Radiological Control*, now have mature training programs, thus an update to DOE-HDBK-1141-2008 is no longer needed. The survey found the standard was relevant and useful as archival material; however, it was not directly used as a training guide and; therefore, was not needed to be actively managed by the TSP. This handbook should be cancelled as an active document and be archived on the TSP Web site.

The normal 60-day comment period is requested, which will begin once the document is posted and available in RevCom.

The AU-11 point of contact for this document is James Dillard, AU-11. Mr. Dillard can be reached at (301) 903-1165 or via e-mail at [james.dillard@hq.doe.gov](mailto:james.dillard@hq.doe.gov).
