Introduction

Phase IV: Facility Practical Training

At DOE sites with more than one facility, and where RCT tasks at each facility may differ, site and facility tasks should be separated. The tasks that are common to all the facilities on the site should be included in Phase II training with the core tasks. Tasks unique to a facility should be added to the training program qualification standard, as an attachment, as Phase IV training. Not all the DOE sites will include Phase IV training in their programs. Phase IV training allows each site to qualify technicians to a select facility. Since the core training for the technicians is standardized, the transfer of technicians between facilities, within a DOE site, requires that only facility tasks be taught, provided the core qualification is current.

Final Verification Signatures

I have verified that I have completed the above documented facility practical training requirements.

Student RCT

Date

I have verified that the facility practical training requirements for the above named individual are satisfactorily completed and am assured that the individual is capable of safely performing all the listed functions of a Radiological Control Technician at

_____ (facility).

Radiological Control Manager or designee

Date
