

U.S. Department of Energy
Washington, D.C.

CORRECTION

DOE-STD-1231-2018

Approved: 12-19-2018

SUBJECT: CORRECTION TO DOE-STD-1231-2018 *Preparation and Conduct of Protective Force Performance Testing*

1. EXPLANATION OF CORRECTION. This Standard was distributed in November 2018, but has since been corrected to be consistent with DOE Order 473.3A, Protection Program Operations, regarding the requirement for duty weapons to have a round in the chamber in certain cases, and for auxiliary weapons to remain free of rounds in the chamber. The correction is intended to mitigate any potential for related operational or safety issues. Copies of the Standard with a November date should be discarded.

2. LOCATIONS OF CORRECTION:

Page	Paragraph	Changed	To
Cover	Date	November	December
B-7	2 nd paragraph under Test Execution	duty	auxiliary
B-19	Example Message Card #1	duty	auxiliary
C-34	Example Message Card #1	duty	auxiliary

3. DISTRIBUTION: This Technical Standard must be handled as Official Use Only information, and will not be available on the Technical Standards Program website. For distribution, contact Carl Pocratsky, 301-903-2769 or carl.pocratsky@hq.doe.gov.
